## About this poll

This report summarises the results of a fortnightly omnibus conducted by Essential Research with data provided by Qualtrics. The survey was conducted online from $14^{\text {th }}$ May to $17^{\text {th }}$ May 2020 and is based on 1,073 respondents.

The methodology used to carry out this research is described in the appendix at the end of the report.

Note that due to rounding, not all tables necessarily total $100 \%$ and subtotals may also vary.

## Coronavirus concerns

Q To what extent are you concerned about the threat of Covid-19 (coronavirus) in Australia?

## Easing restrictions

Q When do you think governments should start to ease the restrictions on travel and gatherings to allow offices, shops, restaurants, other workplaces, and public spaces to start operating again?

|  | 18/05 | 11/05 | 04/05 | 27/04 | 20/04 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| As soon as possible | 9\% | 13\% | 10\% | 10\% | 9\% |
| Within the next 1 to 2 weeks | 13\% | 12\% | 9\% | 7\% | 6\% |
| Within the next month | 23\% | 22\% | 21\% | 18\% | 14\% |
| By the end of next month | 22\% | 20\% | 15\% | 15\% | 13\% |
| It is too soon to consider easing restrictions | 25\% | 27\% | 37\% | 42\% | 49\% |
| Unsure | 8\% | 6\% | 8\% | 8\% | 10\% |
| Base ( n ) | 1,073 | 1,067 | 1,093 | 1,054 | 1,051 |

- Openness to easing the lockdown restrictions continues to increase, with just a quarter ( $25 \%$ ) now believing it's too soon to consider easing restrictions.
- Women (29\%) and those over 55 years (30\%) are most likely to believe it's too soon to consider easing restrictions.

## Belief in Conspiracy Theories

Q Here are some things people have been saying about Covid-19. They're all things that some people say are true and others say aren't true. To what extent do you believe each of the following to true or false?

|  | TOTAL: True | TOTAL: <br> False | Definitely true | Probably true | Probably false | Definitely false | I don't know enough to make a decision |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| The outbreak in China is actually much worse than the official Chinese statistics show | 77\% | 11\% | 33\% | 44\% | 7\% | 4\% | 12\% |
| The Covid-19 virus was engineered and released from a Chinese laboratory in Wuhan | 39\% | 39\% | 14\% | 25\% | 22\% | 17\% | 22\% |
| The number of Covid-19 deaths have been exaggerated by the media and governments to scare the population | 20\% | 71\% | 7\% | 13\% | 23\% | 48\% | 10\% |
| Bill Gates played a role in the creation and spread of Covid-19 | 13\% | 71\% | 4\% | 9\% | 17\% | 55\% | 15\% |
| The Covid-19 virus is not dangerous and is being used to force people to get vaccines | 13\% | 79\% | 4\% | 10\% | 14\% | 65\% | 8\% |
| The 5 G wireless network is being used to spread the Covid-19 virus | 12\% | 75\% | 4\% | 8\% | 14\% | 61\% | 13\% |

| TOTAL: True |  | Gender |  | Age Group |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Male | Female | 18-34 | 35-54 | 55+ |
| The outbreak in China is actually much worse than the official Chinese statistics show | 77\% | 79\% | 75\% | 69\% | 75\% | 85\% |
| The Covid-19 virus was engineered and released from a Chinese laboratory in Wuhan | 39\% | 40\% | 39\% | 41\% | 39\% | 37\% |
| The number of Covid-19 deaths have been exaggerated by the media and governments to scare the population | 20\% | 23\% | 16\% | 30\% | 21\% | 10\% |

| Base (n) | 1,073 | 524 | 549 | 339 | 349 | 385 |

- There is widespread belief that the outbreak in China is actually much worse than the official Chinese statistics show with three-quarters ( $77 \%$ ) believe this to be definitely, or probably true.
- Around the same number of people believe it's true that the Covid-19 virus was engineered and released from a Chinese laboratory in Wuhan as believe it to be false (both $39 \%$ ).
- Only a small minority believe other conspiracy theories to be true.

## Changing attitudes to people

Q As a result of the Covid-19 outbreak, have your views and opinions changes about each of the following groups of people?

|  | More positive view | My views haven't changed | More negative view |
| ---: | :---: | :---: | :---: |
| Health workers and care staff | $56 \%$ | $40 \%$ | $4 \%$ |
| People with mental health issues | $23 \%$ | $69 \%$ | $8 \%$ |
| People who are unemployed | $21 \%$ | $69 \%$ | $10 \%$ |
| People who are homeless | $21 \%$ | $72 \%$ | $7 \%$ |

- Over half of people now feel more positive towards health and care workers as a result of the Covid-19 outbreak (56\%).
- Around one in five people now feel more positive towards people with mental health issues (23\%), those who are unemployed (21\%) or homeless (21\%).

## Employment and Job prospects - Long-term unemployed

Q To what extent do you agree or disagree with the following statements about looking for work when the Covid-19 restrictions are eased?
THOSE WHO WERE UNEMPLOYED BEFORE COVID-19 AND WILL BE LOOKING FOR EMPLOYMENT ONCE RESTRICTIONS ARE LIFTED ( $\mathrm{n}=135$ )

|  | TOTAL: <br> Agree | TOTAL: <br> Disagree | Strongly <br> agree | Somewhat <br> agree | Neither <br> agree, nor <br> disagree | Somewhat <br> disagree |
| ---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Strongly <br> disagree |  |  |  |  |  |  |
| I'm confident l'll be able to find a well- <br> paying job in my field at my level of <br> experience | $29 \%$ | $43 \%$ | $6 \%$ | $23 \%$ | $28 \%$ | $21 \%$ |

- $43 \%$ of people who were unemployed before the Covid-19 outbreak disagree that they'll be able to find a well-paying job in their field at their level of experience and $45 \%$ disagree there will be appropriate jobs for them.

## Employment and Job prospects - Recently unemployed

Q Once the Covid-19 outbreak is over and restrictions are eased, how long do you think it will be before you are back in paid work? THOSE WHO LOST WORK DUE TO COVID-19 (n=134)
$\left.\begin{array}{rr}\text { I don't think I'll find paid work again } & \text { TOTAL } \\ \hline \text { I think it will take a long time for me to find paid work } & 10 \% \\ \hline \text { I don't think l'll be back straight away but l'm confident I'll } \\ \text { find paid work fairly quickly }\end{array}\right)$

- Less than one in five of those who have been made unemployed since Covid-19 think they'll be back in work straight away (18\%).
- $36 \%$ think it will take them a long time to find paid work and $10 \%$ think they may not find paid work again.

## Employment and Job prospects - Employed

Q To what extent you agree or disagree with the following statements about work after the Covid-19 outbreak?
THOSE WHO ARE STILL IN EMPLOYMENT ( $\mathrm{n}=488$ )

|  | TOTAL: Agree | TOTAL: <br> Disagree | Strongly agree | Somewhat agree | Neither agree, nor disagree | Somewhat disagree | Strongly disagree |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I'm confident l'll receive a pay rise soon after things are back to normal | 21\% | 50\% | 6\% | 16\% | 28\% | 24\% | 27\% |
| I'm confident l'll be able to get a promotion if I want one | 22\% | 44\% | 6\% | 16\% | 34\% | 22\% | 22\% |
| I don't think my wages will keep up with increases in the cost of living | 48\% | 19\% | 17\% | 31\% | 33\% | 13\% | 6\% |

- There is low optimism for wage growth following Covid-19. Just $21 \%$ agree (strongly/somewhat) that they expect a pay rise soon after things are back to normal and $22 \%$ expect to be able to gain a promotion.
- Around half of people (48\%) don't think their wages will keep up with increases in the cost of living.

## Appendix: Methodology, margin of error and professional standards

The data gathered for this report is gathered from a fortnightly online omnibus conducted by Qualtrics.
Every two weeks, the team at Essential considers issues that are topical, and a series of questions are devised to put to the Australian public. Some questions are repeated regularly (such as political preference and leadership approval), while others are unique to each week and reflect current media and social issues.

The response rate varies each week, but usually delivers 1000+ interviews. In theory, with a sample of this size, there is 95 per cent certainty that the results are within 3 percentage points of what they would be if the entire population had been polled. However, this assumes random sampling, which, because of nonresponse and less than 100\% population coverage cannot be achieved in practice. Furthermore, there are other possible sources of error in all polls including question wording and question order, interviewer bias (for telephone and face-to-face polls), response errors and weighting.
The online omnibus is live from the Wednesday night and closed on the following Sunday. Incentives are offered to participants. Essential Research uses the Statistical Package for the Social Sciences (SPSS) software to analyse the data. The data is weighted against Australian Bureau of Statistics (ABS) data.
All Essential Research staff hold Australian Market and Social Research Society (AMSRS) membership and are bound by professional codes of behaviour.
