Our researchers are members of the Australian Market and Social Research Society.

## About this poll

This report summarises the results of a fortnightly omnibus conducted by Essential Research with data provided by Qualtrics. The survey was conducted online from $16^{\text {th }}$ to $21^{\text {st }}$ September 2020 and is based on 1,081 respondents.

The methodology used to carry out this research is described in the appendix at the end of the report.

Note that due to rounding, not all tables necessarily total $100 \%$ and subtotals may also vary.

## Support for loan system for aged care

Q The Royal Commission into Aged Care Quality and Assurance is investigating the current funding system for residential support and aged care. One suggestion for improvement is to introduce a loan scheme to pay for a person's care in retirement. The personal loan is paid off using the person's assets only after they die, with any outstanding loan amount covered by the government.

To what extent would you support or oppose this loan system for aged care if it were introduced?

|  | Total | Gender |  | Age Group |  |  | Federal Voting Intention |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

- Just under half of people (48\%) say they would support (somewhat/strongly) a change of funding for aged care to a loan-style system. Under a third opposed the idea (30\%) and a further fifth (22\%) were unsure.
- Younger people aged 18-34 were more supportive of the suggestion than those aged over 55 ( $56 \%$ to $41 \%$ ). There was high support among Coalition voters (57\%).

## Preferred energy sources for Government support

Q As you may be aware, many of Australia's coal-fired power stations are reaching the end of their operational lives and will soon need to be replaced.

Which of the following would you prefer that the government supported?

|  | Total | Gender |  | Age Group |  |  | Federal Voting Intention |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Male | Female | 18-34 | 35-54 | 55+ | Labor | Liberal + National | Greens | TOTAL: Other |
| New coal-fired power stations | 15\% | 19\% | 11\% | 15\% | 14\% | 15\% | 10\% | 20\% | 11\% | 24\% |
| New gas-fired power stations | 15\% | 21\% | 10\% | 13\% | 13\% | 19\% | 12\% | 20\% | 11\% | 13\% |
| Renewable energy solutions (e.g. wind and solar) | 70\% | 60\% | 79\% | 72\% | 73\% | 66\% | 78\% | 60\% | 78\% | 63\% |
| Base ( n ) | 1,081 | 539 | 542 | 338 | 374 | 369 | 298 | 460 | 115 | 104 |

- The vast majority of people would prefer the Government supported renewable energy solutions ahead of coal or gas powered plants.
- $70 \%$ of people opted for renewable power, with just $15 \%$ each selecting gas and coal powered stations.
- The preference for renewables was across all gender, age and voting demographics.
- Those most supportive of renewable energy sources include women (79\%), Labor voters (78\%) and Greens voters (78\%).The highest support for coal-fired power stations was among Coalition voters (20\%), residents of NSW (20\%) and people living in regional areas.

## Appendix: Methodology, margin of error and professional standards

The data gathered for this report is gathered from a fortnightly online omnibus conducted by Qualtrics.
Every two weeks, the team at Essential considers issues that are topical, and a series of questions are devised to put to the Australian public. Some questions are repeated regularly (such as political preference and leadership approval), while others are unique to each week and reflect current media and social issues.

The response rate varies each week, but usually delivers 1000+ interviews. In theory, with a sample of this size, there is 95 per cent certainty that the results are within 3 percentage points of what they would be if the entire population had been polled. However, this assumes random sampling, which, because of nonresponse and less than $100 \%$ population coverage cannot be achieved in practice. Furthermore, there are other possible sources of error in all polls including question wording and question order, interviewer bias (for telephone and face-to-face polls), response errors and weighting.

The online omnibus is live from the Wednesday night and closed on the following Sunday. Incentives are offered to participants. Essential Research uses the Statistical Package for the Social Sciences (SPSS) software to analyse the data. The data is weighted against Australian Bureau of Statistics (ABS) data.
All Essential Research staff hold Australian Market and Social Research Society (AMSRS) membership and are bound by professional codes of behaviour.
